

Index Codes

1 Module Codes

Each module code will consist of three digits. The first digit refers to the year the module is being taken, the second refers to what semester it is taken (0 for a yearlong module), the final digit then refers to the module itself (See Section 4 for full list of module codes).

- 101 $\longrightarrow$ Linear Algebra
- 102 $\longrightarrow$ Mechanics
- 111 $\longrightarrow$ Single Variable Calculus
- 112 $\longrightarrow$ Introduction to Programming
- 113 $\longrightarrow$ Introduction to Probability

2 Subfolder Codes

Each module's folder is split up in to three subfolders each with their own code.

- 01 $\longrightarrow$ Class Notes
- 02 $\longrightarrow$ Problem Sets
- 03 $\longrightarrow$ Other
- 04 $\longrightarrow$ Questions

3 File Codes

Each file is named first off the date (year excluded), which is followed by two digits which separate files created on the same day.

- **Example** $\longrightarrow$ 1509-01 is the first file created on the 15th of September

4 Full List of Module Codes

- 101 $\longrightarrow$ Linear Algebra
- 102 $\longrightarrow$ Mechanics
- 111 $\longrightarrow$ Single Variable Calculus
- 112 $\longrightarrow$ Introduction to Programming
- 113 $\longrightarrow$ Introduction to Probability
- 121 $\longrightarrow$ Analysis on the Real Line
- 122 $\longrightarrow$ Advanced Calculus
- 123 $\longrightarrow$ Introduction to Computation Theory and Logic
- 124 $\longrightarrow$ Introduction to Statistics
